

Homelessness

It's for the
best for party

Thanks, dude.

Have you ever thought about how life would be without a home? If you ever have, then you should agree with me, it's hard. Although it's hard, the government is helping the people who have no home. Governments give the homeless a home to keep their citizens.

One way the government helps the poor is by taxes, they use taxes for the poor. Some other people may lose some money, but otherwise, it's good. You may even lose some money with taxes, but it's for the best for earth. Sometimes, governments don't want to be taking money from people, so instead they ask for donations. Once the money is donated, they give the money to the poor.

Second, the government helps the poor also by providing jobs and opportunities to the poor. Many homeless people don't have a job. So the government offers them one. If they take the job and do good at it, they get money, and the money turns into a house, and the house turns into a home. If they don't, there's nothing the government can do about it. But sometimes, they offer more school time, college, and education. "Section 401 of the Act sets forth the following four TANF purposes: (1) provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives; (2) end the dependence of needy parents on government benefits by promoting job preparation, work,

and marriage; (3) prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and (4) encourage the formation and maintenance of two-parent families.” -

A third way, also the government (Donald Trump) helps by firing other governments to lower tax.” Some homeless people may lose money by taxes. You might know that when there’s a government, their money earned is given with taxes. So if there are not many governments, that means not much taxes. So that is why our government right now (the same president from 2024-2025) is firing governments, really helpful. ““Over the next couple of years, I think we'll ... be cutting income tax — could be almost completely cutting it, because the money we're taking in is going to be so large,’ Trump told service members in a Thanksgiving video.” -

In conclusion, I think the government really supports the poor by taxes, giving opportunities and education, and lowering taxes.
